migration efforts

A no-risk, low-cost
approach

Preparing your business for the future

By 2027, SAP will end support for the previous version of SAP ERP systems, SAP ECC 6.0. As a result, businesses across all industries are beginning to explore SAP S/4HANA. For CIOs and IT leaders, it can be a daunting concept having to migrate all of your data and processes to a new system. But, what if you could test and learn within this new platform without impacting your existing landscape?

The Delaware SAP TestLab enables you to learn fast, with your own recognizable data set, so that you can truly experience the impact of S/4 on your business before you need to migrate for real or re-implement.

Why test with Delaware?

Delaware is a full-service global technology partner with a focus on SAP and complementary technologies. We are one of the few selected partners to be working with SAP on a co-innovation program that's helping to shape the future of the SAP S/4HANA cloud platform.

We focus on the long term; many of our client relationships extend beyond 15 years. As a truly global business, we are SAP's largest implementation partner for SAP S/4HANA Cloud and have referenceable clients in over 20 industries.

The Delaware TestLab Process

We work with you to tailor the process of testing and adapting the TestLab to your business needs.

Step 1	Step 2	Step 3	Step 4	Step 5
Creating a copy of your productive environment and hosting on Microsoft Azure	Create a reduced set of your master data and transactional data	Migration to SAP S/4HANA	Full activation of SAP Fiori through generic roles	Discover SAP S/4HANA on your own, or through the Delaware inspiration packages

Why make the move now?

We enable your business to unleash the full potential of SAP S/4HANA. With extensive knowledge and unparalleled expertise from Delaware, you can quickly realize the business value in starting your migration project now. Testing with your own business data will allow you to discover for yourself how you can work faster, be more agile, and accelerate innovation.

Achieve business benefits before your competitors:

By 2027, SAP support for its existing suite will end. Beat the competition and prepare your business now.

Make decisions faster:

SAP HANA's super-fast analytics engine optimizes processes, delivers embedded reporting and enables real-time data.

Drive results from innovation:

It won't be long until an increasing number of new SAP applications will only be available on SAP S/4HANA. Migration needs to happen now to drive business results from emerging technologies.
